NEW QUESTION: 1

A user is trying to create an EBS volume with the highest PIOPS supported by EBS. What is the minimum size of EBS required to have the maximum IOPS?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

NEW QUESTION: 2

Examine the Fast-start configuration

Oracle Error Conditions: (none)

Which three are true?

- A. The observer is running
- B. The configuration operates in Maximum Performance mode
- C. a failover may occur if the observer has lost connectivity to the primary database, even if the FastStart Failover target standby database has a good connection to the primary database
- D. An automatic failover will be initiated even if the target standby database lags behind the primary
- E. The observer will initiate a failover when the primary database is unable to produce local archived redo log files.
- F. The configuration operates in Maximum Availability mode

Answer: A,E,F

NEW QUESTION: 3

You need to monitor infrastructure and manage software deployments for an organization. You must uninstall unlicensed software from all devices.

Which tool should you use?

- A. System Center Configuration Manager (ConfigMgr)
- B. Microsoft Intune
- C. Microsoft Assessment and Planning Toolkit (MAP)
- D. Microsoft Desktop Optimization Pack (MDOP)

Answer: A

NEW QUESTION: 4

You have a proprietary data store on-premises that must be backed up daily by dumping the data store contents to a single compressed 50GB file and sending the file to AWS. Your SLAs state that any dump file backed up within the past 7 days can be retrieved within 2 hours. Your compliance department has stated that all data must be held indefinitely. The time required to restore the data store from a backup is approximately 1 hour. Your on-premise network connection is capable of sustaining 1gbps to AWS.

Which backup methods to AWS would be most cost-effective while still meeting all of your requirements?

- A.** Transfer the daily backup files to an EBS volume in AWS and take daily snapshots of the volume
- B.** Host the backup files on a Storage Gateway with Gateway-Cached Volumes and take daily snapshots
- C.** Transfer the daily backup files to S3 and use appropriate bucket lifecycle policies to send to Glacier
- D.** Send the daily backup files to Glacier immediately after being generated

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Because in the stored volume mode, you are storing data locally, the binary-compressed format is already available, and the bandwidth of your AWS connection meets the 7days/2hour SLA.
