NEW QUESTION: 1

Your on-permission network contains the web application shown in the following table.

You purchase Microsoft 365, and the implement directory synchronization.

You plan to publish the web applications.

You need to ensure that all the applications are accessible by using the My Apps portal. The solution must minimize administrative effort.

What should you do first?

- A. Deploy one conditional access policy.
- B. Create four application registrations.
- C. Deploy one Application Proxy connector.
- D. Create a site-to-site VPN from Microsoft Azure to the on-premises network.

Answer: C

Explanation:

Explanation

The Application Proxy connector is what connects the on-premises environment to the Azure Application Proxy.

Application Proxy is a feature of Azure AD that enables users to access on-premises web applications from a remote client. Application Proxy includes both the Application Proxy service which runs in the cloud, and the Application Proxy connector which runs on an on-premises server. Azure AD, the Application Proxy service, and the Application Proxy connector work together to securely pass the user sign-on token from Azure AD to the web application.
