There is a strong possibility that most of these dumps you will find in your actual 1z0-1077-22 test, If you want to have free exam questions or lower-priced practice materials, our website provide related materials for you.

To make sure that our 1z0-1077-22 training braindumps are the best on matter on the content or on the displays, we invite volunteers to experience our 1z0-1077-22 real exam before selling to customers.

NEW QUESTION: 1

An organization is having a VPC for the HR department, and another VPC for the Admin department. The HR department requires access to all the instances running in the Admin VPC while the Admin department requires access to all the resources in the HR department.

How can the organization setup this scenario?

- A.** Setup ACL with both VPCs which will allow traffic from the CIDR of the other VPC.
- B.** Setup VPC peering between the VPCs of Admin and HR.
- C.** It is not possible to connect resources of one VPC from another VPC.
- D.** Setup the security group with each VPC which allows traffic from the CIDR of another VPC.

Answer: B

Explanation:

Explanation/Reference:

Explanation:

A Virtual Private Cloud (VPC) is a virtual network dedicated to the user's AWS account. It enables the user to launch AWS resources into a virtual network that the user has defined. A VPC peering connection allows the user to route traffic between the peer VPCs using private IP addresses as if they are a part of the same network.

This is helpful when one VPC from the same or different AWS account wants to connect with resources of the other VPC.
