NEW QUESTION: 1

Given:

What is the output?

- A. I am an object array
- B. I am an object
- C. The compilation fails due to an error in line 1.
- D. I am an array

Answer: C

Explanation:

NEW QUESTION: 2

You have a Microsoft 365 subscription.

All users are assigned Microsoft Azure Active Directory Premium licenses.

From the Device Management admin center, you set Microsoft Intune as the MDM authority.

You need to ensure that when the members of a group named Marketing join a device to Azure Active Directory (Azure AD), the device is enrolled automatically in Intune. The Marketing group members must be limited to five devices enrolled in Intune.

Which two options should you use to perform the configurations? To answer, select the appropriate blades in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Device enrollment manager (DEM) is an Intune permission that can be applied to an Azure AD user account and lets the user enroll up to 1,000 devices You can create and manage enrollment restrictions that define what devices can enroll into management with Intune, including the:

- * Number of devices.
- * Operating systems and versions.

The Marketing group members must be limited to five devices enrolled in Intune References: <https://docs.microsoft.com/en-us/intune/enrollment/device-enrollment-manager-enroll>

NEW QUESTION: 3

HOTSPOT

You have a standalone computer that runs Windows 10 Enterprise. The computer is configured to automatically back up files by using File History. The user of the computer uses the OneDrive desktop app to sync files.

The Previous Versions settings from the local group policy of the computer are shown in the following graphic.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

When a file is deleted from the local OneDrive folder with File Explorer, the deletion is replicated to Onedrive.com and the file is moved to the OneDrive recycle bin. The deleted file can therefore be recovered from the Recycle Bin on Onedrive.com.

If a user deletes a file from a local drive by using File Explorer, the file cannot be restored. If the file is not in the OneDrive folder, it will not be a file that is synced to onedrive.com. We could use Previous Versions to restore the file but this is prevented by the Group Policy settings. The "Prevent restoring local previous versions" - Enabled group policy setting would prevent the previous version from being restored.
