There is Software version of our C1000-137 exam braindumps, it can simulate the real exam environment, Conclusion From now on, it' s time to count on yourself and your **Latest C1000-137 Exam Discount.pdf** mad multi-tasking skills to manage work life, social life and online learning life.

NEW QUESTION: 1

Evaluate the following SQL statements:

Exhibit: You issue the following command to create a view that displays the IDs and last names of the sales staff in the organization.

Exhibit:

Which two statements are true regarding the above view? (Choose two.)

- A.** It allows you to insert IDs, last names, and job IDs of the sales staff from the view if it is used in multitable INSERT statements
- B.** It allows you to insert rows into the EMPLOYEES table
- C.** It allows you to delete details of the existing sales staff from the EMPLOYEES table
- D.** It allows you to update job IDs of the existing sales staff to any other job ID in the EMPLOYEES table

Answer: A,C

NEW QUESTION: 2

You have a model with a large difference between the training and validation error values. You must create a new model and perform cross-validation.

You need to identify a parameter set for the new model using Azure Machine Learning Studio.

Which module you should use for each step? To answer, drag the appropriate modules to the correct steps.

Each module may be used once or more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Split data

Box 2: Partition and Sample

Box 3: Two-Class Boosted Decision Tree

Box 4: Tune Model Hyperparameters

Integrated train and tune: You configure a set of parameters to use, and then let the module iterate over multiple combinations, measuring accuracy until it finds a "best" model. With most learner modules, you can choose which parameters should be changed during the training process, and which should remain fixed.

We recommend that you use Cross-Validate Model to establish the goodness of the model given the specified parameters. Use Tune Model Hyperparameters to identify the optimal parameters.
