- C. Srvct1add service-dbmycdb -service salesrep-pdbservicesalespdb
- D. Srvct1add service-dbmycdb -service salesrep -pdb create salespdb

Answer: B

NEW QUESTION: 2

Which of the following listeners causes an object of the implementing class to be notified when it is added to or removed from a session?

- A. HttpSessionAttributeListener
- B. HttpSessionBindingListener
- C. HttpSessionActivationListener
- D. HttpSessionListener

Answer: B

NEW QUESTION: 3

Which two events occur when a packet is decapsulated in a GRE tunnel? (Choose two.)

- A. The TTL of the payload packet is decremented.
- B. The destination IPv4 address in the IPv4 payload is used to forward the packet.
- C. The source IPv4 address in the IPv4 payload is used to forward the packet.
- D. The version field in the GRE header is incremented.
- E. The TTL of the payload packet is incremented.
- F. The GRE keepalive mechanism is reset.

Answer: A,B

Explanation:

Explanation/Reference:

Explanation:

After the GRE encapsulated packet reaches the remote tunnel endpoint router, the GRE packet is decapsulated. The destination address lookup of the outer IP header (this is the same as the tunnel destination address) will find a local address (receive) entry on the ingress line card. The first step in GRE decapsulation is to qualify the tunnel endpoint, before admitting the GRE packet into the router, based on the combination of tunnel source (the same as source IP address of outer IP header) and tunnel destination (the same as destination IP address of outer IP header). If the received packet fails tunnel admittance qualification check, the packet is dropped by the decapsulation router. On successful tunnel admittance check, the decapsulation strips the outer IP and GRE header off the packet, then starts processing the inner payload packet as a regular packet.

When a tunnel endpoint decapsulates a GRE packet, which has an IPv4/IPv6 packet as the payload, the destination address in the IPv4/IPv6 payload packet header is used to forward the packet, and the TTL of the payload packet is decremented.
