NEW QUESTION: 4

Rick works as an Office Assistant for Tech Perfect Inc. He is creating a report through Microsoft Excel 2010. Rick wants to interact with cell data but his computer does not contain VBA code and few features of his computer are still Excel 5.0 features. Which of the following will Rick use to accomplish the task?

A. Form control

B. Evaluate Formula

C. Accounting template

D. Trust Center

Answer: A

Explanation:

A form control is an original control that is compatible with old versions of Excel, beginning with Excel version 5.0. It is designed for use on XLM macro sheets. It can be used when a user wants to simply interact with cell data without using VBA code and when he wants to add controls to chart sheets. By using form controls, the user can run macros. He can attach an existing macro to a control, or write or record a new macro. These controls cannot be added to UserForms, used to control events, or modified to run Web scripts on Web pages. Answer option A is incorrect. The accounting template is used for numbering months of a financial year to period numbering. It is used to compare month to month, actual v budget, quarter to quarter, year to year variances. It is the initial point for other reports that need the use of months. Answer option Disincorrect. Evaluate Formula is the formula examination tool provided by Microsoft Excel. This tool is useful for examining formulas that do not produce any error but are not generating the expected result. Answer option B is incorrect. Trust Center is where a user can find security and privacy settings for Microsoft Office 2010 programs.
