NEW QUESTION: 1

Which of the following describes the Alcatel-Lucent 7750 SR Input/Output Module (IOM)?

- A. Converts traffic from an external standard format to an internal format.
- B. Contains a CPU for managing the forwarding hardware in each flexible fast path.
- C. Small optical module available in a variety of formats.
- D. Contains the CPU that runs the routing protocol software as well as the switch fabric.

Answer: B

NEW QUESTION: 2

In order to be considered a compensating control, which of the following must exist:

- A. A legitimate technical constraint or a documented business constraint
- B. A legitimate technical constraint
- C. A documented business constraint
- D. A legitimate technical constraint and a documented business constraint

Answer: A

NEW QUESTION: 3

A system administrator has concerns regarding their users accessing systems and secured areas using others' credentials. Which of the following can BEST address this concern?

- A. Implement biometric readers on laptops and restricted areas.
- B. Enforce a policy shortening the credential expiration timeframe.
- C. Create conduct policies prohibiting sharing credentials.
- D. Install security cameras in areas containing sensitive systems.

Answer: A

Explanation:

Biometrics is an authentication process that makes use of physical characteristics to establish identification. This will prevent users making use of others credentials.

NEW QUESTION: 4

You have a Linux compute Instance located in a public subnet in a VCN which hosts a web application. The security list attached to subnet containing the compute Instance has the following stateful Ingress rule.

Which step will resolve the issue?

- A.** In the route table, add a rule for your default traffic to be routed to NAT gateway.
- B.** In the security list, remove the ssh rule.
- C.** In the route table, add a rule for your default traffic to be routed to service gateway.
- D.** In the security list, add an ingress rule for port 80 (http).

Answer: D

Explanation:

Explanation

Add stateful ingress rule to receive and respond to HTTP traffic.

Example: Instance A and Host B are communicating (Host B could be any host, whether an instance or not).

The stateful ingress rule allows traffic from any source IP address (0.0.0.0/0) to destination port 80 only (TCP protocol). No egress rule is required to allow the response traffic.
