Creating an Image for Rapid Deployment

The most common scenario for ImageX is capturing and applying an image from a network location for rapid deployment. This scenario requires booting your technician computer into Windows PE, capturing the image with ImageX, putting the image on a network share, and then applying the image to the destination computers.

ImageX is a command-line tool that enables original equipment manufacturers (OEMs) and corporations to capture, to modify, and to apply file-based disk images for rapid deployment. ImageX works with Windows image (.wim) files for copying to a network, or it can work with other technologies that use .wim images, such as Windows Setup, Windows Deployment Services (Windows DS), and the System Management Server (SMS) Operating System Feature

Deployment Pack.
