#### **NEW QUESTION: 4**

When a visitor adds a product to the cart, the method in which the visitor found product on the site (i.e.,

"Product Finding Method") is set in an eVar12 as a merchandising eVar. An example of the data being sent to Adobe Analytics when a cart add beacon/server call is fired is shown below:

There are no values in eVar12 reporting, and the syntax for eVar12 is correct. Only one product can be added to a cart at a time. The cart add event properly shows in the products report for products such as 'product A' above.

Why are the cart adds and the product report populated, while the reporting for eVar12 contains no values?

- A. eVar12's merchandising binding event is incorrectly set to the scAdd event
- B. Merchandising variables tied to products must always be set in the product string with the corresponding product.
- C. A custom event should also be set with a merchandising eVar.
- D. eVar12 is improperly configured for 'product' syntax in the Adobe Analytics Admin Console.

**Answer: B**
