Passwords must meet complexity requirements

This security setting determines whether passwords must meet complexity requirements.

Complexity requirements are enforced when passwords are changed or created.

If this policy is enabled, passwords must meet the following minimum requirements when they are changed or created:

1. Passwords must not contain the user's entire samAccountName (Account Name) value or entire displayName (Full Name) value.

2. Passwords must contain characters from three of the following five categories:

-Uppercase characters of European languages (A through Z, with diacritic marks, Greek and Cyrillic characters)

-Lowercase characters of European languages (a through z, sharp-s, with diacritic marks, Greek and Cyrillic characters)

-Base 10 digits (0 through 9)

-Nonalphanumeric characters: [\[email protected\]](#)#\$%
