You need to provide a user named User1 the ability to modify records in the zone. Other users must be prevented from modifying records in the zone.
What should you do first?

This security feature is not available with standard primary zones.
DNS update security is available only for zones that are integrated into Active Directory. Standard (not an Active Directory integrated zone) has no Security settings:

You need to firstly change the "Standard Primary Zone" to AD Integrated Zone:

Now there's Security tab:
