Answer: A,E

NEW QUESTION: 3

Which two are true with respect to the unified ports on the Cisco Unified Computing System 62XX Fabric Interconnect? (Choose two.)

- A. By default, unified ports that are changed to Ethernet port mode are set to uplink Ethernet port type.
 - B. Ethernet ports must be grouped together in a block and must start with the first port and end with an odd numbered port.
 - C. In a standalone configuration, making port mode changes to the fixed module will not cause the fabric interconnect to reboot.
 - D. The port mode is automatically discovered after plugging in a LAN or Fibre Channel-attached cable.
 - E. After making port mode changes on an expansion module, the module will reboot.
 - F. After making Ethernet and Fibre Channel ports is supported on the expansion module.
- Answer: B,E**

NEW QUESTION: 4

What is a Type 1 hypervisor?

- A. runs on a virtual server and depends on an already installed operating system
- B. run on a virtual server and includes its own operating system
- C. runs directly on a physical server and depends on a previously installed operating system
- D. runs directly on a physical server and includes its own operating system

Answer: D

Explanation:

There are two types of hypervisors: type 1 and type 2 hypervisor.

In type 1 hypervisor (or native hypervisor), the hypervisor is installed directly on the physical server. Then instances of an operating system (OS) are installed on the hypervisor. Type 1 hypervisor has direct access to the hardware resources. Therefore they are more efficient than hosted architectures. Some examples of type 1 hypervisor are VMware vSphere/ESXi, Oracle VM Server, KVM and Microsoft Hyper-V.

In contrast to type 1 hypervisor, a type 2 hypervisor (or hosted hypervisor) runs on top of an operating system and not the physical hardware directly. A big advantage of Type 2 hypervisors is that management console software is not required. Examples of type 2 hypervisor are VMware Workstation (which can run on Windows, Mac and Linux) or Microsoft Virtual PC (only runs on Windows).
