#### **NEW QUESTION: 2**

The connection using fiber optics from a phone company's branch office to local customers is which of the following?

- A. new loop
- B. indigenous loop
- C. local loop
- D. loopback

**Answer: C**

Explanation:

In telecommunications Telecommunication the local loop is the wiring between the central office and the customer's premises demarcation point. The telephony local loop connection is typically a copper twisted pair carrying current from the central office to the customer premises and back again. Individual local loop telephone lines are connected to the local central office or to a remote concentrator.

Local loop connections can be used to carry a range of technologies, including: Analog Voice ISDN DSL

#### **NEW QUESTION: 3**
