NEW QUESTION: 3

A. Option C
B. Option A
C. Option B
D. Option E
E. Option D
Answer: B,C
Explanation:
A: Below we see a case where we set the row archival visibility parameter to "all"
thereby allowing us to see all of the rows that have been logically deleted:
alter session set row archival visibility = all;
We can then turn-on row invisibility back on by changing row archival visibility = "active":
alter session set row archival visibility = all;

B: To use ora_archive_state as an alternative to deleting rows, you need the following settings and parameters:
1.Create the table with the row archival clause
create table mytab (col1 number, col2 char(200)) row archival;
2.Now that the table is marked as row archival, you have two methods for removing rows, a permanent solution with the standard delete DML, plus the new syntax where you set ora_archive_state to a non-zero value:
update mytab set ora_archive_state=2 where col2='FRED';
3.To make "invisible rows" visible again, you simply set the rows ora_archive_state to zero:
update mytab set ora_archive_state=0 where col2='FRED';
Note:
* Starting in Oracle 12c, Oracle provides a new feature that allow you to "logically delete" a row in a table without physically removing the row. This effectively makes deleted rows "invisible" to all SQL and DML, but they can be revealed at any time, providing a sort of "instant" rollback method.
To use ora_archive_state as an alternative to deleting rows.
