Is your ability below theirs?

### NEW QUESTION: 1

単一のステートメントで複数の入力とマッチするように、シスコASAアクセスリスト入力のどのタイプが設定できるか？

- A. オブジェクトグループ
- B. ネストされたオブジェクトクラス
- C. クラスマップ
- D. 拡張ワイルドカードマッチング

**Answer: A**

Explanation:

Reference:

<http://www.cisco.com/en/US/docs/security/asa/asa82/configuration/guide/objectgroups.html>

Explanation:

Information About Object Groups

By grouping like objects together, you can use the object group in an ACE instead of having to enter an ACE for each object separately. You can create the following types of object groups:

\*Protocol

\*Network

\*Service

\*ICMP type

For example, consider the following three object groups:

\*MyServices - Includes the TCP and UDP port numbers of the service requests that are allowed access to the internal network.

\*TrustedHosts - Includes the host and network addresses allowed access to the greatest range of services and servers.

\*PublicServers - Includes the host addresses of servers to which the greatest access is provided.

After creating these groups, you could use a single ACE to allow trusted hosts to make specific service requests to a group of public servers.

You can also nest object groups in other object groups.

### NEW QUESTION: 2

A gap analysis is performed to measure the skill gap between current executives and the type of executives in order to have a truly global workforce. Which of the following analysis techniques does this

measure utilize?

- A. Norm-referenced analysis
