## Certification Exam Materials

By using our Pega Certified System Architect (PCSA) 87V1 training vce, users received agreeable outcomes, Do not worry now, our PEGAPCSA87V1 valid test torrent will be your best choice for preparation.

The High passing rate also proves that choosing us is choosing [C-TS450-2020 Pdf Pass Leader](#) the path lead to success, So there are many merits of our product, If you are still lingering, we'll show you the fact.

Everything you do will help you pass the PEGAPCSA87V1 exam and get your PEGAPCSA87V1 certificate.

### NEW QUESTION: 1

You administer a Microsoft SQL Server 2016 instance.  
You need to configure a new database to support FILETABLES.  
What should you do? Choose all that apply.

- A. Set the FILESTREAM directory name on the Database.
- B. Create a non-empty FILESTREAM file group.
- C. Configure the Database for Partial Containment.
- D. Enable Contained Databases on the Server Instance.
- E. Enable FILESTREAM on the Server Instance.
- F. Disable FILESTREAM on the Database.

**Answer: A,B,E**

Explanation:

Explanation

### NEW QUESTION: 2

Your Exadata X6-2 Database Machine has the exachk utility preinstalled.  
You decide to use it periodically to validate the installation against Oracle's recommended best practices.

Which three actions could you take to do this?

- A. Use exachk to schedule itself to run at regular intervals.
- B. Create a OS job in Enterprise Manager to run the exachk utility at regular intervals.
- C. Use a cron job on a database node to run it at regular intervals.
- D. Run it once each cell and it will then perform periodic monitoring automatically.
- E. Use a cron job on each cell to run it at regular intervals.

**Answer: A,B,C**

Explanation:

AD: To schedule exachk, we can create a cron job or we can create a job in Enterprise Manager..  
To add an Enterprise Manager job to execute Exachk on a periodic basis. Execute the following steps. First go to

Enterprise, Job, Library. Then create a new OS Command job

E: exachk options include AUTORUN\_SCHEDULE, which schedules recurring health checks using the AUTORUN\_SCHEDULE daemon option.

[http://docs.oracle.com/cd/E68491\\_01/OEXUG/automated-daemon-mode-operation.htm](http://docs.oracle.com/cd/E68491_01/OEXUG/automated-daemon-mode-operation.htm)  
Best practices: Execute the latest version of the exachk utility before and after planned maintenance activities and at least once every month

### NEW QUESTION: 3

User1 has been given subscription permissions on topic MYTOPIC defined with the string TPC/SMC.

Which of the following actions can User1 perform?

User1 can subscribe on topic string:

- A. TPC/+MWY
- B. TPC/'SMC/MWY/#
- C. TPC#
- D. TPC/WWY/SMC

**Answer: D**

### NEW QUESTION: 4

- A. Option C
- B. Option A
- C. Option D
- D. Option B

**Answer: C**

Explanation:

A is not correct because a single load balancer with URL maps is sufficient.

B is not correct because it goes against the requirements. The company wants to keep the old API available while new customers and testers try the new API.

C is not correct because it is not a requirement to decommission the implementation behind the old API. Moreover, it introduces unnecessary risk in case bugs or incompatibilities are discovered in the new API.

D is correct because an HTTP(S) load balancer can direct traffic reaching a single IP to different backends based on the incoming URL.
