NEW QUESTION: 2

An unchecked exception occurs in a method `dosomething()`. Should other code be added in the `dosomething()` method for it to compile and execute?

- A.** The Exception must be caught
- B.** The Exception must be declared to be thrown.
- C.** No other code needs to be added.
- D.** The Exception must be caught or declared to be thrown.

Answer: C

Explanation:

Because the Java programming language does not require methods to catch or to specify unchecked exceptions (`RuntimeException`, `Error`, and their subclasses), programmers may be tempted to write code that throws only unchecked exceptions or to make all their exception subclasses inherit from `RuntimeException`. Both of these shortcuts allow programmers to write code without bothering with compiler errors and without bothering to specify or to catch any exceptions. Although this may seem convenient to the programmer, it sidesteps the intent of the catcherspecifyrequirement and can cause problems for others using your classes.

NEW QUESTION: 3

Which of the following will cause a switch port to go into the errdisable state?

- A. configuration ports into EtherChannel
- B. BPDUguard
- C. Dynamic ARP inspection
- D. IGMP Snooping
- E. security violation
- F. storm control

Answer: B,E,F
